ABOUT ME

I'm a junior web developer. I started learning nine years ago. I was self-taught until two years ago, when I started studying web development. I've always thought programming is a little bit like magic: even the simplest tricks can amaze almost anyone. And even though I know how most of them are done... they still surprise me. Because knowing about something doesn't mean I cease to have that fascination that made me start learning.

LANGUAGES

- Spanish Native
- English Advanced
B2 level title: 2019
- Catalan: Native
